

Our SM-EOD devices destroy almost all mines and duds in a safe, simple and effective way, also under difficult conditions. Armies and NGOs worldwide use our products daily.

Our small SM-EODs are non-magnetic to avoid dangerous and disturbing fragment. The possibility to air transport (Class 1.4 S) as well as low- or high-order detonation are further advantages of these systems.

Heavy-duty SM-EODs are designed to be effective to a soil depth of 4.5 m.

„SM“ is a Trade Mark of SBDS Ltd

## SM-EOD devices against land mines and UXOs
